

## ●Our greenhouse gas emission reduction target

Our greenhouse gas emission reduction target, which was certified by SBT, is as follows:

FY2030 target

Scope 1 and Scope 2 (\*1): 42% reduction compared to fiscal 2024

Our environmental policy is to balance our business activities with environmental protection. We are committed to reducing energy consumption and CO<sub>2</sub> emissions to create environmentally friendly products. In 2022, we established the mid-term management plan "Change to Grow," which prioritizes our efforts to reduce carbon emissions. We are working to reduce environmental impact through our products and services.

In October 2025, a new factory will be completed with a solar power system for self-consumption.

We will continue to reduce greenhouse gas emissions through various initiatives, including promoting energy efficiency, expanding the use of renewable energy, and improving the environmental performance of our products and services.

\*1 Scope 1: Direct greenhouse gas emissions by a company (fuel combustion, etc.)

Scope 2: Indirect emissions from the use of electricity, heat, and steam supplied by other companies

CO<sub>2</sub> emissions trends (2024 standard → 2030 42% reduction target)
